

Welcome to Mrs. Jurcsek's 7th Grade!

I am looking forward to teaching you in 7th grade! You will be with me for homeroom, lunch, life science and dismissal. My job is to teach you science, but I also have the important task of making sure you are ready to lead our school as 8th graders! As a 7th grader, you will be doing a lot of service for our school and our community. We run all of the food and clothing drives, and partner with prek/kindergarten for their special events, safety drills and science labs..

Below is your supply list, but if you have something, like a sketch book, it is not necessary to buy a new one for the upcoming year. **You can find your summer Math and Language Arts on the school website as well as on the eBoards of Mrs. Intartaglia and Ms. Phillips.**
